## Contents

Summary

4	Correlation matrices	1
3	What explains the A codes?	5
4	What explains the B and C codes?	19
5	What explains the D codes?	31

## 1 Summary

There are four categories of response

- 1. A: Opinions, thoughts and feelings
- 2. B: Problems and negative experiences
- 3. C: Benefits and positive experiences
- 4. D: Actions to improve the relationship (i.e. things the government could do to improve things)

There are also overall codes for whether a subject is referring to strict direct experience, broad direct experience or hearsay.

We have separated the interviews into A, B, C and D sections but unfortunately, there are a lot of codes in the "wrong" sections. As we can see in Figure 1, while A codes appear in Section A more than other sections, they don't only appear in Section A. We therefore probably need to predict each code for the whole interview, not just the corresponding Section.

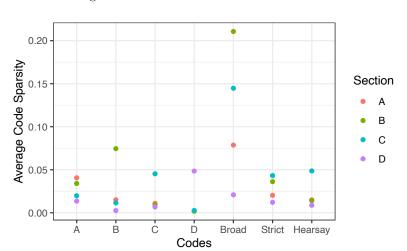

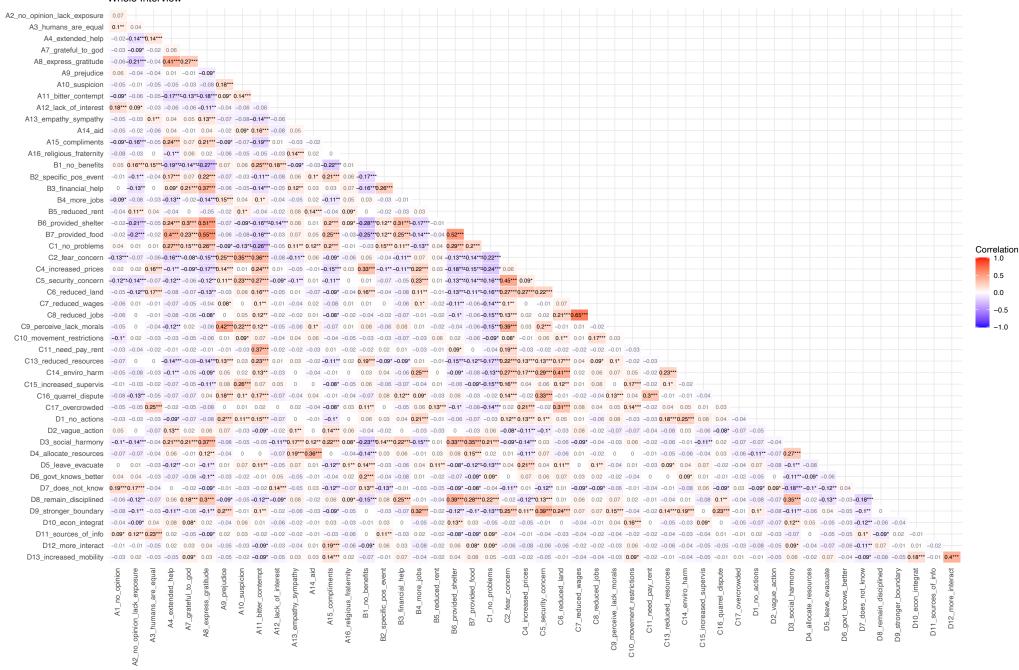

Figure 1: Prevalence of codes across sections

## 2 Correlation matrices

#### Whole Interview

#### 'Correct' Section

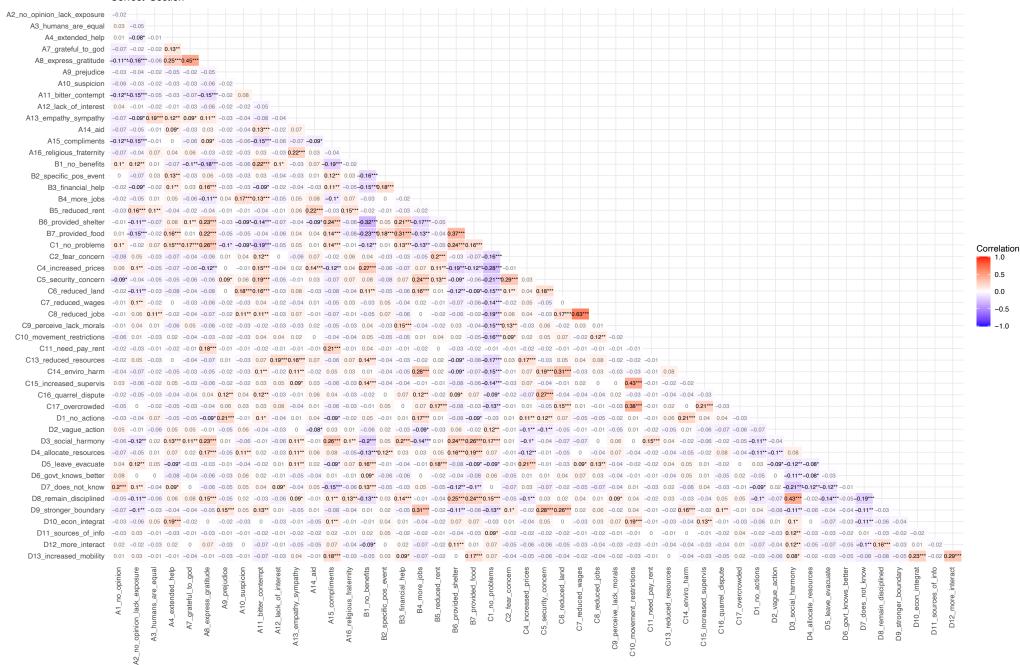

Table 1: A1.no.opinion
